

# Javanshir S.

Senior Golang Developer

TechHive  
IT's simple with us

## Professional summary

Senior software engineer with 7+ years of experience in software development. Over 4+ years of commercial experience in Golang. Skilled in AWS services. Has extensive practical hands-on experience in design and microservices architecture development. Possesses a good knowledge of object-oriented programming, functional programming and software development life cycle. Javanshir's core competency is to be able to jump into any phase of the project lifecycle with full efficiency, create a plan and deliver technical solutions. He thrives to go above and beyond to deliver only exceptional results and exceed client's expectations.

## Education

Azerbaijan State Marine Academy  
Bachelor`s Degree

## Skills

Go, Python  
JavaScript  
Go Echo, Go-Micro  
SQL, PostgreSQL  
Redis, DynamoDB  
AWS, GCP  
Terraform, Kubernetes, Docker  
gRPC/ Protobuf  
REST API  
Dgraph  
Git, Git Flow  
RESTful WebServices  
RabbitMQ  
Linux, Debian

<b>Project</b>	<b>NDA</b>
Period	May 2021 – till now
Role	Senior Software Engineer
Technologies	Golang, Terraform, gRPC, CI/CD, Kubernetes, Vue.js, RabbitMQ, google PUB/SUB
<b>Responsibilities</b>	
<ul style="list-style-type: none"><li>• not subject to disclosure</li></ul>	

<b>Project</b>	<b>Buglance</b>
	Buglance is a crowdsourced testing platform that utilises the power of crowd to revolutionize software testing industry
Period	Dec 2019 – April 2021
Role	Senior Software Engineer
Technologies	Golang, gRPC, AWS, GCP, Kubernetes, React, PUB/SUB, PostgreSQL, MySQL

### **Responsibilities**

- Participated in the development of the main services of the products as one of the key members of the team, which has more than 30 engineers in the department;
- Integrated new tests;
- Implemented changes to platform, which provides service to 10000+ communities and 100+ customer members;
- Created new software specifications;
- Architecture design;
- Provided proof of concepts for 50 micro-services quarterly in an Agile environment utilizing a test-driven development approach.

	<b>Ante Technologies LLC</b>
<b>Project</b>	Ante Technologies is a vanguard of online marketing, leading to top global choices across varied industries
<b>Period</b>	Nov 2017 - Nov 2019
<b>Role</b>	Senior Software Engineer
<b>Technologies</b>	Python, Django, Golang, Node.js, AWS Lambda, Kubernetes, React, PostgreSQL, MongoDB
<b>Responsibilities</b>	
<ul style="list-style-type: none"><li>• Designed and developed 100+ native applications;</li><li>• Created benchmark reports for latency-critical APIs that were responding to more than 200 milliseconds;</li><li>• Created quick wins for a platform that was generating 100k revenue daily without missing the global picture;</li><li>• Led weekly engineering tech discussions;</li><li>• Participated in the hiring of the new team members as a product tech stack expert.</li></ul>	

<b>Project</b>	<b>Safaroff</b>
	NDA
Period	Aug 2014 - Nov 2017
Role	Software Developer
Technologies	Python, Django, Flask, AWS, JavaScript, Backbone
<b>Responsibilities</b>	
<ul style="list-style-type: none"><li>• Implemented various web tasks according to the daily requirements of the customer;</li><li>• Designed and implemented micro-services from requirements to the production and commercial deployment;</li><li>• Supported 200+ of existing web applications;</li><li>• Architecture design and development from scratch of the social network, e-commerce, banking platforms;</li><li>• Developed RESTful APIs and web apps from end to end (full-stack);</li><li>• Working experience in Agile, Lean Dev methodologies, and test-driven development;</li><li>• Managed the infrastructure, while using the cloud to minimize it.</li></ul>
