

Hugo R.

Golang Developer

TechHive
IT's simple with us

Professional summary

Technology passionate Software Engineer with 8+ years of development experience, including 5 years of coding in Golang. Skilled in Amazon Web Services and feels confident with microservices creation. Hugo focuses his career on the development of high quality and useful pieces of software such as mobile and web applications, taking care of efficiency and UX/UI improvement. He is committed to creation of digital strategies in order to transform technology into experience to make the traditional user tasks easier. Can perform coding in different languages such as Golang/JS/TS/PHP and is eager to learn new technologies and tools.

Education	Universidad Central de Venezuela, 2007-2015 Computer Engineer specialized in Internet Application Technology, Science Faculty
Skills	Golang, TypeScript, JavaScript, PHP Node.js React.js, Next.js Oracle, MySQL, PostgreSQL DynamoDB RabbitMQ AWS (S3, ECR, EC2, RDS, Serverless & Lambda functions) Elasticsearch CakePHP / Laravel / Yii Grafana, Jaeger, Prometheus HTML5, CSS3, SASS Docker Git

Company	WES-IT
	Blockchain
Period	Jun 2022 – till now Full-time, remote
Role	Golang Developer
Technologies	Golang, AWS, Docker, Prometheus, Grafana, GraphQL

Responsibilities

- Created GitHub Actions to run Unit and Integration tests;
- Created releases, built and pushed Docker images to ECR;
- Built traces and metrics and sent to Prometheus/Jaeger with open telemetry;
- Built REST API and GraphQL client to support multiple requests to different services;
- Implemented clean architecture and layered architecture in projects to have an optimized project division of concerns;
- Designed complex and scalable features to fulfill the different use cases in the project;
- Coded several Unit and Integration tests for important modules inside the project.

Company	Ballast Lane Applications LLC
	Software Development Company
Period	Jul 2021 - Jun 2022 Full-time, remote
Role	Golang Developer
Technologies	Golang, AWS, Kibana

Responsibilities

- Implemented new features inside of the project in multiple microservices in parallel;
- Continuously worked on building complex queries and aggregations on Elastic Search;
- Used Kibana and then implemented the solution in ES Golang package;
- Built and coded several Unit and Integration tests using TDD paradigm;
- Created and connected small isolated services either using AWS Serverless or new Golang Microservices;
- Configured and developed a workflow and activities using Temporal Cloud Server;
- Worked with multiple teams using Scrum methodology and its ceremonies.

Company	Publipromueve
	Software Development Company
Period	Nov 2017 - Jul 2021 Full-time, remote
Role	Software Developer
Technologies	Golang, TypeScript, Node.js, React.js, Next.js, AWS

Responsibilities

- Developed several landings based on responsive design, flex grid, transitions, reusable components with React.js packages;
- Configured initial project environments with React.js, Laravel, Lumen, Node.js, Golang API;
- Implemented e-commerce on frontend with React.js using styled components, contexts and React Hooks and TypeScript;
- Created CRUD's from several modules with Golang and connected to AWS S3 to handle file resources with AWS profile and IAM Role;
- Implemented e-commerce platforms using Golang API role based and JWT Auth, Next.js for SEO compatibility using clean architecture;
- Implemented clean architecture, repository pattern and hexagonal architecture on Golang, Node.js and Lumen API's.

Company	La Causa Agencia Móvil Imperial Web Solutions Mi Tienda Labs
	Software Development Companies
Period	Aug 2013 - Nov 2017 Full-time, remote
Role	Software Developer
Technologies	PHP
Responsibilities	
<ul style="list-style-type: none">• Developed College Cupid as a date mobile application such Tinder – IONIC;• Built hybrid apps using Cordova and PhoneGap;• Was Magento Developer & MEAN Stack Developer.
