

Sergei D.

Node.js Backend Developer

TechHive
IT's simple with us

Professional summary

Software engineer with strong Node.js knowledge and good React background. Open-minded, curious, trying to be helpful and never stop learning. Sergei really cares about new working methods and new technologies that let improve processes and efficiency. He is able to work for the result either independently with limited supervision, or in a team environment.

Education

Kemerovo State University
Bachelor degree of Information Technologies

JSNAD: OpenJS Node.js Application Developer
[Certificate](#)

Skills

Node.js
JavaScript
React, Redux
PHP
HTML5
Firebase
MongoDB
Mongoose
Sequelize
PostgreSQL, MySQL
Agile, Scrum
Gitlab

Project	Adtube Solutions
	Advertisement platform
Period	Apr 2021 – present
Role	Senior Software Engineer
Technologies	Node.js/Express, MongoDB/Mongoose, Typescript, Oauth2.0 flows, React.js, Apollo GraphQL Server
Responsibilities	
<ul style="list-style-type: none">• Implementation of new functionality and features using Node.js• Development of React based frontend• Code review• Setting up and maintenance of build system for production and development• API implementation• Unit and integration tests• Bugs fixing• Troubleshooting	

Project	EPAM systems
	Analytical dashboards with geo for commercial services
Period	Sep 2020 - Apr 2021
Role	Fullstack Software Engineer
Technologies	React.js, Typescript, REST, Django
Responsibilities	
<ul style="list-style-type: none">• Node.js back-end development• Development of React based frontend• Built RESTful API architecture for new features• Code review• Tests coverage• Bugs fixing• Troubleshooting	

Project	Greenatom
	Business solutions
Period	Mar 2020 - Aug 2020
Role	Backend Engineer
Technologies	Node.js, React.js, Typescript, Moleculer
Responsibilities	
<ul style="list-style-type: none">• Software development for the corporate HR department for complex business connections establishment• Implementation of new features and functionality• REST API development• Technical expertise• Cross-functional team communication• Deployment activities• Integration and using of Moleculer - progressive microservices framework for Node.js	

Project	Alfa Insurance
	Insurance
Period	Jul 2019 - Feb 2020
Role	React Developer
Technologies	React.js, Redux
Responsibilities	
<ul style="list-style-type: none">• Complex document processing React SPA• Using hooks, Redux state-management• Full cycle CI/CD• Cross-functional team communication• Tests coverage• Performance improvements• Implementation of new features enabling users to get quality results	

Project	Santino
	Several small projects
Period	Jan 2018 - Dec 2019
Role	Software Engineer
Technologies	React.js, Redux, MongoDB, Mongoose, Sequelize, Postgres, Vanilla
Responsibilities	
<ul style="list-style-type: none">• Created and maintained numerous projects, including GitHub/GitLab CI/CD workflows, Docker containers, Node.js API, Firebase, Atlas MongoDB, Mongoose, Sequelize, Postgres, vanilla javascript frontend and React SPAs• Performance improvements• Implementation of new features• Analyzed business requirements• Bugs fixing• Troubleshooting
